MICHAEL BAHH
SUPERVISORY PATENT EXAMINER

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments are not commensurate with the scope of the claims, it appears as though applicants are asking the examiner to read limitations into the claims that are not there. The use of the word "multi-layer" broadly construed can read on the fact that there is a base layer present with a water-repellant layer directly on top of it., as shown by applicant's exhibit A And the added limitations are either vague and indefinite or are product-by-process limitations which are given little to no patentable weight when the final structure is found. It is also confusing how applicants feel that a woven fabric would not be produced using some sort of yarn. The term yarn can read on any fiber, string or other similar piece that would be woven into a fabric.
